

# QUART

QUAD AD ENVELOPE & LFO

10HP

**An easy-to-handle Quad AD Envelope & LFO, perfect for those functions that you need without overthinking!**

**QUART** has **4 independent functions** that can work as Low Frequency Oscillators or Attack-Decay Envelopes depending on whether the Trigger Inputs is connected or not.

If the Trigger Input is not connected, the function will **oscillate freely** (LFO) but if a patch cable is connected, it will work as an **Envelope** (AD).

**QUART** also has **3 speed ranges** for each function, that will cover all your needs:

- **FAST.** Designed to perform audio range LFO, and very snappy envelopes.
- **MEDIUM.** Classic envelope Rise & Fall and normal LFO rates.
- **SLOW.** Convenient for long evolving patches and pads.
